To  
The Dean  
Faculty of Science  
Osmania University, Hyderabad.

Sub: Submission of Re-Structured Syllabus of B.Sc. Microbiology  
(CBCS). Reg.

Sir,

With reference to the subject cited, I am herewith sending one copy of B.Sc. (CBCS) modified new syllabus of all semesters for your kind perusal. The syllabus is prepared according to the given template of UGC for 150 credits.

Thanking you,

Yours sincerely,

(Dr. B. Bhima)

Chairman, Board of Studies

Department of Microbiology, UCS, O.U.

 Dr.B.Bhima  
 Chairman, BoS  
 Dept. of Microbiology  
 Osmania University, Hyd.

Dept. Microbiology: Osmania University

Proposed scheme for B.Sc Microbiology program under choice based credit system (CBCS)

With effect from 2020-21

Syllabus for B.Sc Microbiology

Code: BS, DSC- 1A

B.Sc I year: I Semester

**Title: GENERAL MICROBIOLOGY**

**4HPW -Credits-4**

### **UNIT-1: INTRODUCTION TO MICROBIOLOGY**

Meaning, definition and scope. History of microbiology: Contribution of Louis Pasteur and Robert Koch. Importance and application of Microbiology.

Principles of Microscopy-Bright field, Dark field, Phase-contrast, Fluorescent and Electron microscopy (SEM and TEM). Principles and types of stains-simple stain, differential stain, negative stain. Structural stain-spore, capsule, flagella. Bacterial motility - Hanging drop method.

### **UNIT-2: STRUCTURE OF BACTERIA, VIRUSES & PURE CULTURE CONCEPT**

Prokaryotes - Ultra structure of eubacteria.

General characteristics and classification of virus.

Morphology and structure of TMV and HIV. Structure and multiplication of lambda bacteriophage.

Isolation of pure culture techniques- Enrichment culturing, Dilution plating, streak plate, spread plate, Micromanipulator. Preservation of Microbial cultures – Sub culturing, overlaying cultures with minerals oils, lyophilization, sand cultures, storage at low temperature.

### **UNIT-3: MICROBIAL NUTRITION AND METABOLISM**

Microbial Nutrition – Nutritional requirement, Uptake of nutrients by cell. Nutritional groups of microorganisms – Autotrophs, Heterotrophs, Mixotrophs. Components and types of bacterial growth media – simple and complex media.

Respiration – Glycolysis, HMP Pathway, ED Pathway , TCA Cycle and Anaplerotic reaction, Electron Transport, Oxidative and substrate level phosphorylation.

### **UNIT-4: STERILIZATION TECHNIQUES AND MICROBIAL GROWTH**

Sterilization and disinfection techniques - Physical methods- Autoclave, Hot air oven, Laminar air flow, Filter sterilization. Radiation methods - U.V rays, Gamma rays, Ultrasonic methods. Chemical methods - Alcohols, Aldehydes, Phenol, Halogens and Hypochlorides.

Microbial growth – Different Phases of Growth in Batch culture. Factors Influencing microbial growth. Synchronous, Continuous, Biphasic Growth. Methods for measuring microbial growth – Direct Microscopic, Viable count, Turbidometry, Biomass.

**General Microbiology**  
**PRACTICALS**

**2HPW-Credits-1**

- Handling and calibration of light microscope.
- Simple and differential staining (Gram staining), Spore staining.
- Microscopic observation of cyanobacteria (Nostoc, Spirulina), algae and fungi (Saccharomyces, Rhizopus, Aspergillus, Pencillium, Fusarium).
- Isolation of T2 bacteriophage from sewage sample.
- Preparation of media for culturing autotrophic and heterotrophic microorganisms – algal medium, mineral salts medium, nutrient agar medium, McConkey agar and blood agar.
- Sterilization techniques: Autoclave, Hot air oven and filtration.
- Enumeration of bacterial numbers by serial dilution and plating (viable count)
- Isolation of pure cultures by streak, spread and pour plate techniques
- Preservation of microbial cultures- Slant, Stab, Sand cultures, mineral oil overlay and glycerol stocks
- Turbidometric measurement of bacterial growth and plotting growth curve.

Dept. Microbiology: Osmania University

Proposed scheme for B.Sc Microbiology program under choice based credit system (CBCS)

With effect from 2020-21

Syllabus for B.Sc Microbiology

Code: BS, DSC-1B

B.Sc I year: II Semester

Title: MICROBIAL DIVERSITY

4HPW- Credits-4

#### UNIT 1: CONCEPT OF BIODIVERSITY

Basic concept of Biodiversity and Conservation. Elements of Biodiversity - Ecosystem Diversity, Genetic Diversity, Species Abundance & Diversity. Economic Value of Biodiversity & Legal, Ethical and Conservation issues related to uses of biodiversity.

Classification of living organisms; Haeckel, Whittaker and Carl Woese systems. Differentiation of prokaryotes and eukaryotes.

Classification of bacteria as per the second edition of Bergey's manual of systematic bacteriology.

#### UNIT 2: PROKARYOTIC MICROBIAL DIVERSITY

General characteristics of eubacteria, Rickettsia and Mycoplasma.

Microbial richness: Exploration, significance, conservation and applications. Structural and physiological diversity of Archaea bacteria, Metabolic characteristics of extremophiles (Methanogens, Halophiles, thermoacidophiles).

Gram negatives: Cyanobacteria and Proteobacteria, Gram positives and heterogenous members including Firmicutes, Actinobacteria, Bacteroidetes, Acidobacteria and Planctomycetes

#### UNIT 3: EUKARYOTIC MICROBIAL DIVERSITY

Eukaryotic microbial diversity. Structural, physiological and metabolic characteristics, of Algae - Cyanophyta, Chlorophyta Bacillariophyta, Phacophyta, Rhodophyta; Fungi -Phycomycetis, Basidiomycetis, Zygomycetes, Oomycetes, Ascomycetes, Deuteromycetes (imperfect and perfect stages) and Protozoa - Giardia, Entamoeba and Plasmodium.

#### UNIT 4: MICROBIAL ECOSYSTEMS

Microbial interactions: Symbiosis, neutralism, commensalism, competition, antagonism, synergism, parasitism.

Understanding microbial diversity with Cultivated vs Uncultivated microorganisms.

The Great Plate count anomaly . Cultivation independent methods to assess microbial diversity.

Preserved and perturbed microbial ecosystems, microbiome for sustainable agroecosystems,

Human microbiome

## MICROBIAL DIVERSITY

### PRACTICALS

**2HPW-Credits-1**

- Isolation of Methanogenic bacteria from manure by anaerobic culturing
- Isolation and enumeration of halophiles from saline environment
- Isolation of bacteria from diversified habitats to demonstrate antagonism, commensalism and synergism
- Isolation of *Cyanobacteria* and fungi from different habitats
- Identification of fungi by staining techniques
- Microscopic observation of soil algae and Protozoa
- Winogradsky's column to demonstrate microbial diversity
- Visit and observe any nearby unique ecosystems to understand the role of microorganisms
- Demonstration of the great plate count anomaly

## SKILL ENHANCEMENT COURSE-I (SEC-I)

Dept. Microbiology: Osmania University

Proposed scheme for B.Sc Microbiology program under choice based credit system (CBCS)

With effect from 2020-21

Syllabus for B.Sc Microbiology

Code: BS, SEC-1

B.Sc II year: III Semester

Title: HAEMATOLOGY

2HPW-Credits-2

### UNIT-1: INTRODUCTION TO BLOOD

Blood: definition, characters, composition. Collection of blood – capillary blood: from adults and infants, examinations employed. Venous blood: from adults and infants, examinations employed. Composition of blood (RBC, WBC, Plasma, Serum, Platelet cells), Staining of blood films. Total blood picture, Differential count. Blood grouping, Rh-typing. Haemoglobin: composition and normal values, haemoglobin estimation Anti-coagulants.

### UNIT-2: BLOOD TRANSFUSION

Principles of blood transfusion, Donor screening – cross matching, collection of blood, preservation and storage. Precautions of handling blood and its products. Challenges in management of Hemophilia and Anaemia. General account on spread of diseases through blood and blood products. Coagulation mechanism: factors, bleeding time, clotting time. Haematological indices: packed cell volume. Erythrocyte sedimentation: principle – determination.

Syllabus for B.Sc Microbiology

Code: BS, DSC-1C

**B.Sc II year: III Semester**

**Title: FOOD AND ENVIRONMENTAL MICROBIOLOGY**

**4 HPW-Credits-4**

**UNIT 1: FERMENTED FOODS**

Introduction to fermented foods; Health aspects of fermented foods; Fermented vegetables: Processing and fermentation of Sauerkraut and pickles, idly. Dairy Microbiology - Types of microorganisms in milk, significance of microorganisms in milk, Microbial products of milk- Bulgarian milk, Kefir, cheese, yogurt; Microorganisms as food; Probiotics and Prebiotics.

**UNIT 2: MICROBIAL FOOD SPOILAGE AND POISONING**

Microbial Spoilage of foods; Microbial Food poisoning, risks and hazards; Mycotoxins and their poisoning/toxicity; Food preservation methods and food safety issues. Food Quality: Importance and functions of quality control. Methods of quality assessment of foods; Screening and Enumeration of spoilage microorganisms, Detection of pathogens in food.

**UNIT 3: AIR AND WATER MICROBIOLOGY**

Microorganisms in air and their importance (brief account); Microorganisms and water pollution Water-borne pathogenic microorganisms and their transmission; Sanitary quality of water; Water pollution due to degradation of organic matter; Aerobic and Anaerobic sewage treatment,

**UNIT 4: SOIL MICROBIOLOGY**

Soil properties (physical, chemical and biological), Soil microorganisms, Methods of enumeration and activity of microbes in environment/soil; Microbes and plant interactions – Rhizosphere, Phyllosphere and Mycorrhizae; Introduction to Microbial Bioremediation, Microbial degradation of organic pollutants; Carbon and Nitrogen cycle.

## FOOD AND ENVIRONMENT MICROBIOLOGY

### PRACTICALS

2HPW-Credits-1

- Determination of microbiological quality of milk by MBRT method.
- Isolation of fungi & bacteria from spoiled fruits/vegetables/Milk/Meat products.
- Isolation of microorganisms from air by impingement method.
- Microbiological examination of water by coliform test.
- Determination of biological oxygen demand.
- Extraction of Mycotoxins from contaminated grains/foods.
- Detection of Mycotoxins
- Isolation and identification of probiotic bacteria
- Isolation and identification of probiotic yeast

**B.Sc III year: IV Semester**

**Title: MUSHROOM CULTIVATION**

**2HPW-Credits-2**

**UNIT-1**

- Introduction to mushroom cultivation
- Importance and history of mushroom cultivation in India
- Global status of mushroom production
- Edible mushrooms (white button oyster, Paddy straw).
- Nutritional value and health benefits of mushrooms

**UNIT-2**

- Steps in mushroom cultivation
  - a. Selection of site and types of mushroom
  - b. Mushroom farm structure, design layout
  - c. Principle and techniques of compost and composting
  - d. Principle of spawn production
  - e. Casing and crop production
  - f. Harvesting and marketing
  - g. Entrepreneurship development in Mushroom cultivation
- Pest and pathogens of mushrooms
- Post harvest handling and preservation of mushrooms

Syllabus for B.Sc Microbiology

Code: BS, DSC-1D

B.Sc II year: IV Semester

**Title: MEDICAL MICROBIOLOGY & IMMUNOLOGY**

**4 HPW-Credits-4**

**UNIT-1: MEDICAL BACTERIOLOGY**

Histry of Medical Microbiology. Normal flora of human body,  
Host pathogen interactions. Bacterial toxins, virulence and attenuation. Antimicrobial resistance.  
Air borne diseases - Tuberculosis.  
Food and waterborne diseases- Cholera, Typhoid.  
Contact diseases - Syphilis, Gonorrhoea. General account of nosocomial infections.

**UNIT-2: MEDICAL VIROLOGY AND PARASITOLOGY**

Food and waterborne diseases - Poliomyelitis, Amoebiasis.  
Insect borne diseases- Malaria, Dengue fever.  
Zoonotic diseases – Rabies  
Viral diseases- Hepatitis B, HIV, SARS, MERS; Air borne diseases- Influenza.

**UNIT-3: INTRODUCTION TO IMMUNOLOGY**

History of immunology. Cells and organs of immune system- Primary and Secondary lymphoid organs. Functions of B&T Lymphocytes, Natural killer cells, Polymorphonuclear cells.  
Structure and classification of Antigens, Factors affecting antigenicity.  
Antibodies- Basic structure, Types, properties and functions of immunoglobulins.  
Types of immunity- Innate and Acquired; Humoral and cell mediated immune response.  
Major Histocompatibility Complex- Class I and II

**UNIT-4: IMMUNOLOGICAL DISORDERS AND AG-AB REACTIONS**

Types of hypersensitivity - Immediate and delayed.  
Systemic and localized autoimmune disorders  
Complement pathways – Classical and Alternate.  
Types of Antigen-Antibody reactions- Agglutination, blood groups, precipitation, neutralization, complement fixation test. Labeled antibody based techniques- ELISA, RIA and Immunofluorescence; Polyclonal and monoclonal antibodies production and application

Dr. B. Bhima  
Chairman, BoS  
Dept. of Microbiology  
Osmania University, Hyd.

## MEDICAL MICROBIOLOGY & IMMUNOLOGY

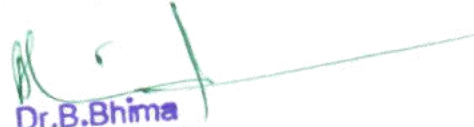

### PRACTICALS

2HPW- Credits-1

- Determination of blood grouping and RH typing.
- Total count of RBC and WBC.
- Differential count of blood leucocytes.
- WIDAL test for typhoid(slide test)by Ag-Ab reactions
- VDRL test for syphilis (slide test) by Ag-Ab reactions.
- Ouchterlony double diffusion test
- Separation of serum and plasma
- IMViC test - Indole test, Methyl red test, VogesProskauer test, Citrate utilization test.
- Oxidase test.
- Catalase test.
- Antibiotic sensitivity testing – Disc diffusion method

Dept. Microbiology: Osmania University

Proposed scheme for B.Sc Microbiology program under choice based credit system (CBCS)

With effect from 2020-21

Syllabus for B.Sc Microbiology

Code: BS, GE

B.Sc III year: V semester

**Title: MICROBIOLOGY AND HUMAN HEALTH**

**4 HPW-credits-4**

**UNIT-1: INTRODUCTION**

Historic developments of Microbiology, contributions of Van Leeuwenhoek, Edward Jenner, Louis Pasteur, Robert Koch.

Types of microorganisms, Morphological characteristics of bacteria, Staining, cultivation methods of bacteria, Culture Media used for the growth of microorganisms.

**UNIT-2: MICROORGANISMS: GOOD AND BAD**

Microorganisms related to human health. Normal microbial flora, Human microbiome concept.

Bacterial disease: Typhoid, Tuberculosis, Syphilis

Viral diseases: Flu, SARS, MERS, SARS-CoV-2, HIV

Insect borne: Malaria and Dengue

**UNIT-3: IMMUNITY AND HEALTH**

Introduction to immune system; Understanding the terms: Disease, Infection, Pathogenicity, Prophylaxis, Host resistance, Innate immunity and acquired immunity, Epidemics, Endemics and Pandemics; Importance of probiotics and vaccines for human health

**UNIT-4: WASTE MANAGEMENT AND HEALTH HAZARDS**

Health hazards associated with dumpage of Industrial and Biomedical waste.

National and international guidelines for the disposal of waste. Guidelines of Central Pollution Control Board (CPCB). Safe disposal and pretreatment of wastes. Mechanical and chemical treatment of the waste. Autoclaving, incineration.

With effect from 2020-21

Syllabus for B.Sc Microbiology

Code: BS, DSE-1A

B.Sc III year: V Semester

Title: MOLECULAR BIOLOGY & MICROBIAL GENETICS

4HPW-credits-4

### UNIT-1: MICROBIAL GENETICS

Fundamentals of Genetics – Mendelian laws, Alleles, Crossing over and Linkage  
DNA and RNA as genetic material  
Structure of DNA – Watson and Crick model  
Extra chromosomal genetic elements – Plasmids and Transposons  
Replication of DNA- Semi conservative mechanism

### UNIT-2: MUTATIONS AND GENETIC RECOMBINATION

Mutations – Spontaneous and induced, Base pair changes, Frameshift, Deletion, Inversion, Tandem duplication, Insertion  
Various physical and chemical mutagens  
Outline of DNA damage and repair mechanism  
Brief account on gene transfer among bacteria – Transformation, Transduction and Conjugation

### UNIT-3-GENE EXPRESSION

Concept of gene – Mution, Recon and Cistron  
One gene – one enzyme , One gene – one Poly peptide , One gene – one product hypothesis  
Types of RNA and their functions  
Outline of RNA transcription in Prokaryotes  
Genetic code, Structure of Ribosomes and brief account on protein synthesis  
Type of genes – Structural, Constitutive, Regulatory  
Operon concept.Regulation of gene expression in bacteria – Lac Operon.

### UNIT-4-RECOMBINANT DNA TECHNOLOGY

Basic principles of genetic engineering –Restriction endonucleases,  
DNA polymerases and Ligases, vectors  
Outline of gene cloning methods.  
Genomic and cDNA libraries  
General account on application of genetic engineering in industry, agriculture and medicine.

  
Dr. B. Bhima  
Chairman, BoS  
Dept. of Microbiology

## MOLECULAR BIOLOGY & MICROBIAL GENETICS

### PRACTICALS

2HPW- credits-1

- Colorimetric estimation of proteins by Biuret method.
- Colorimetric estimation of DNA by Diphenyl amine method.
- Colorimetric estimation of RNA by Orcinol method
- Extraction of genomic DNA
- Extraction of plasmid DNA
- Separation and observation of genomic DNA by Agarose gel Electrophoresis
- Separation and observation of plasmid DNA by Agarose gel Electrophoresis

Syllabus for B.Sc Microbiology

Code: BS, DSE-1B

B.Sc III year: 5th semester

Title: MICROBIAL OMICS

4 HPW-Credits-4

### UNIT 1: INTRODUCTION TO OMICS

Introduction to molecular biology. Structure of DNA, RNA. Multi omics approach for analysis of Microbial biology: Genomics, Transcriptomics (RNA-Seq), Proteomics, Metabolomics, Metagenomics and their applications; Basic Concepts in high throughput sequencing or Next-Generation Sequencing methods for use in food-microbiology, diagnostics and Human health.

### UNIT 2: PROTEOMICS

Protein structure – Different levels of protein structure, Protein Folding and unfolding. Protein secondary and 3D structure prediction methods. X-ray crystallography, NMR and homology modeling. Protein micro arrays- Protein Markers, Clinical Proteomics, Protein engineering, Proteomic strategies in Cancer, Prions.

### UNIT 3: GENOMICS

An introduction of functional genomics; Site-directed mutagenesis, Transposon mutagenesis, DNA microarray, RNA interference, and Chromatin immune precipitation.

Genome annotation, Applications of functional genomics in vaccine and drug designing, Genome editing tools such as CRISPR/Cas9. Databases of Microbial Genomics; Microbial genome projects

### UNIT 4: BIOINFORMATICS

Introduction to Bioinformatics and Molecular Databases, Primary Databanks – NCBI, EMBL, DDBJ; Secondary Databases – UNIPROT; Structural Database –PDB; Database similarity search (FASTA, BLAST); Alignment: Pairwise and Multiple sequence alignment; Whole genome sequence; Genome Annotation and Gene Prediction; Primer Designing; Phylogenetic analysis and Tree construction.

## MICROBIAL OMICS

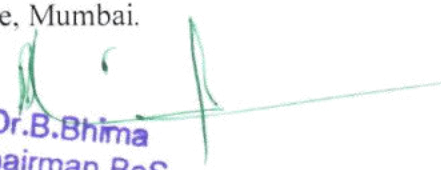

### PRACTICALS

2HPW-credits-1

1. Protein isolation from *E coli*.
2. Sequence analysis of proteins (by BLAST, ClustalW and Phylip).
3. Protein structure prediction by Homology modeling.
4. Isolation of Genomic DNA from *E.coli* and its demonstration by OD and agarose electrophoresis
5. Isolation of plasmid DNA from *E.coli* and its demonstration by OD and agarose electrophoresis
6. DNA molecular size determination
7. Primer designing using online software
8. PCR amplification of genes and detection of amplicon by agarose gel electrophoresis

With effect from 2020-21

Syllabus for B.Sc Microbiology

Code: DSE-2A

B.Sc III year: VI Semester

Title: INDUSTRIAL MICROBIOLOGY

4 HPW-Credits-4

**UNIT-1: MICROORGANISMS AND SELECTION**

Introduction to Industrial Microbiology, Microorganisms of industrial importance -Yeast, Molds, Bacteria, Actinomycetes. Screening and selection of industrially useful microbes. Steps to maintain seed culture and inoculation strategies for enhanced product yield. Strain improvement strategies. Immobilization methods – adsorption and entrapment.

**UNIT-2: FERMENTATION**

Design of bioreactor. Physico-chemical standards used in bioreactors. Limitations of bioreactor, Fermentation equipment and its use. Design of fermentor, type of fermenter, agitation, aeration, antifoam, pH and temperature control. Stages of fermentation process. Inoculation media and fermentation media ; Raw materials used in fermentation industry and their processing, Downstream processing.

**Unit-3: TYPES OF FERMENTATION**

Types of fermentations: Batch, Fed batch, continuous types and kinetics. Submerged, surface, solid state, dual and multiple fermentations. Advantages and disadvantages of solid substrate and liquid fermentations. Fermentation. Common Microbial fermentation, alcohol and lactic acid fermentation.

**UNIT-4: MICROBIAL PRODUCTS**

Industrial products derived from microbes: vitamins: B12; Vaccines: recombinant vaccines, production of beverages (beer and wine), biofuels (biogas and methane), enzymes (amylase), antibiotics (penicillin), aminoacids (glutamic acid), organic acid (citric acid). Disposal of industrial waste.

**INDUSTRIAL MICROBIOLOGY**  
**PRACTICALS**

**2HPW-Credits-1**

1. Screening for amylase producing microorganisms
2. Screening for organic acid producing microorganisms
3. Estimation of Ethanol by potassium dichromate method.
4. Production of citric acid by submerged fermentation
5. Estimation of Citric acid by titrimetry method.
6. Estimation of penicillin.
7. Bacterial slides- Bacillus, Lactobacillus, Yeast, Aspergillus, Pencillium

Syllabus for B.Sc Microbiology

Code: DSE-2B

B.Sc III year: VI Semester

Title: PHARMACEUTICAL MICROBIOLOGY

4 HPW-Credits-1

**Unit-1: INTRODUCTION TO CHEMOTHERAPY**

History of chemotherapy – plants and arsenicals as therapeutics, Paul Ehrlich and his contributions, selective toxicity and target sites of drug action in microbes. Development of synthetic drugs – Sulphanamides, antitubercular compounds, nitrofurans, nalidixic acid, metronidazole group of drugs.

**Unit-2: ANTIBIOTICS**

The origin, development and definition of antibiotics as drugs, types of antibiotics and their classification. Non-medical uses of antibiotics. Principles of chemotherapy – Clinical and lab diagnosis, sensitivity testing, choice of drug, dosage, route of administration, combined/mixed multi drug therapy, control of antibiotic/drug usage.

**Unit-3: DRUG RESISTANCE**

The phenomenon of drug resistance, clinical basis of drug resistance, biochemistry of drug resistance, genetics of drug resistance in bacteria.

Mode of action of important drugs – Cell wall inhibitors (Betalactam – eg. Penicillin), membrane inhibitors (polymyxins), macromolecular synthesis inhibitors (streptomycin), antifungal antibiotics (nystatin)

**Unit-4: MICROBIOLOGICAL ASSAYS**

Assays for growth promoting substances, nutritional mutants and their importance. Drug sensitivity testing methods and their importance. Assay for antibiotics – Determination of MIC, the liquid tube assay, solid agar tube assay, agar plate assay (disc diffusion, agar well and cylinders cup method).

## PHARMACEUTICAL MICROBIOLOGY (CBCS)

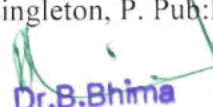

### PRACTICALS

2 HPW- Credits-1

1. Tests for disinfectants (Phenol coefficient/RWC)
2. Determination of antibacterial spectrum of drugs/antibiotics
3. Chemical assays for antimicrobial drugs
4. Testing for antibiotic/drug sensitivity/resistance
5. Determination of MIC for antimicrobial compounds
6. Microbiological assays for antibiotics (Liquid tube assay, agar tube assay, agar plate assays)

Proposed scheme for B.Sc Microbiology program under choice based credit system (CBCS)

With effect from 2020-21

Syllabus for B.Sc Microbiology

Code: BS

B.Sc III year: VI Semester

Title: APPLIED MICROBIOLOGY

3 HPW-Credits-3

**UNIT-1: MICROBIAL PRODUCTS FOR SMALL SCALE ENTREPRENEURS**

Maintenance of type strains or reference strain of microorganisms: culture collection centres (MTCC, ATCC). Patenting process and IPR. Microorganisms in agriculture. Nitrogen fixation and phosphate solubilization. Biofertilizers- Production of azolla, rhizobium and mycorrhizae. Biofungicides- Mass production of Trichoderma and Pseudomonas. Biopesticides- Bacterial, fungal and viral.

**UNIT-2: METABOLIC ENGINEERING FOR MICROBIAL PRODUCTS**

Production of microbial pigments (prodigiosin, violacein, monascin). Bacterial and algal carotenoids. Microorganisms for flavor and aroma production. Biotransformation and metabolic engineering of microorganisms to produce compounds such as esters, terpenes, aldehydes, lactones, geosmin, vanillin and coumarin.

**UNIT-3: MICROBIAL DIAGNOSTICS AND HEALTH**

Diagnostic microbiology: collection, transport and culturing of clinical samples. Preparation and use of culture media for detection of microbial pathogens. Examination of sample by staining - Gram stain, Ziehl-Neelsen staining for tuberculosis, Blood smear for malarial parasite. Serological methods for rapid detection of bacterial, fungal and viral pathogens.

Techniques used for the diagnosis of hospital acquired infections and multi drug resistant microorganisms. Monitoring of sanitation in community –Biohazard disposal.

## APPLIED MICROBIOLOGY

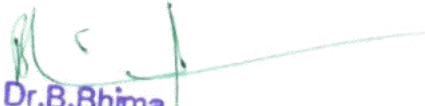

### PRACTICALS

2 HPW-Credits-1

1. Isolation and enumeration of Rhizosphere microorganisms.
2. Isolation of Rhizobium from leguminous root nodules.
3. Staining & observation of mycorrhizal fungi.
4. Mass production of Rhizobium, Mycorrhizae, Trichoderma and Pseudomonas using different carriers / substrates and methods to assay quality control of bioproducts
5. Grams staining
6. Ziehl-Nielsen staining
7. Blood smear

**Code: BS**

**B.Sc III year: 6<sup>th</sup> semester**

**Title: PROJECT**

**5 HPW-Credits-4**

1. Number of students who will be offered project work will vary batch to batch depending upon the infrastructural facilities and may vary each year (Not exceeding 5 students per group).
2. Project work will involve experimental work and the student will have to complete this in stipulated time.
3. The final evaluation of the project work will be through a Panel involving internal and external examiners.
4. Students will be asked their choice for Project work at the beginning of VI semester and all formalities of topic and mentor selection will be completed.

Project work will be offered in lieu of expertise and infrastructural facilities of the department and will be evaluated for 4 credits.

5. The distribution of marks for project work will be:

Project work: 100 Marks (50 marks for dissertation + 25 marks for research skills + 25 marks for research work presentation).
